- Modern and intuitive user interface

RORO TALLY

ACCURATELY CAPTURE FINAL CARGO STOWAGE IN REAL TIME, ONLINE AND OFFLINE

Terminal operators aim to have clear visibility of their cargo at any point in time, anywhere on the port. Jade Logistics' web app, Tallyman, works with Master Terminal® to enable the port tallyman to confirm the final stowage of cargo on a vessel in real time, prior to departure.

Terminal operators aim to have clear visibility of their cargo at any point in time, anywhere on the port. Jade Logistics' web app, RORO Tally, works with Master Terminal® to enable the port tallyman to confirm the final stowage of cargo on a vessel in real time, prior to departure.

Working with Roll-On/Roll-Off (RORO) and Lift-On/Lift-Off (LOLO) planning in Jade Logistics'

Master Terminal, RORO Tally operates on modern touch–screen devices and web browsers. Tallyman assists in creating a more complete picture of cargo transactions, enabling ports to operate with increased efficiency based on these insights.
Designed for RORO and LOLO cargo, RORO Tally is a member of the Master Terminal Web Apps Suite.

CARGO MOVE APP

The Cargo Move application, the next gen mobile application from Navis is used in the General Cargo (GC) operations. You are allowed to create work instructions in N4, thus creating plans. This application acts as a tool for executing the general cargo plans. It communicates with N4 to fetch, update, and complete the required operations of GC plans.

FEATURES

- Login by CHE operators and choose the required CHE

- Displaying Job List for chosen CHE

- Claiming the Job by operator either as full or partial manner

- Completing the Job or Abandoning the Job.
