About East Coast Dist.

Temperature-controlled logistics provider to the food and beverage industry

A preeminent leader of integrated temperature-controlled logistics services to the food and beverage industry. With state-of-the-art facilities strategically located on or near major ports, expedited customs exam services and transportation capabilities offering an end-to-end solution that is sophisticated and seamless.

Challenges

The company's primary site is at Port Elizabeth, NJ. This site is both large and complex. It is 60 acres in size, including about 14.5 acres for customs and 1.5 million square feet of refrigerated facility space. Furthermore, it spans six lots, three main buildings, and holds 1,100 containers and many chassis. The services supported by the site include warehousing, customs examinations, drayage operations, TL, and LTL transportation services.

Results

- 19% increase in overall productivity
- 30% reduction in expense
- Increased spotter productivity reducing from 10 to 7 yard trucks
