

LOAD TRACKER

Real-Time Insights for Smarter Logistics Management

CAMS Prospero, now a part of Kaleris Transportation Management, is designed to streamline the inbound logistics process by facilitating management of multiple sites and integrating with advanced tools for load tendering, carrier integration, and profitability analysis.

Streamline the delivery process with Load Tracker.

Load Tracker is a web-based application integrates directly with Kaleris TMS (Transportation Management System) and ELD (Electronic Logging Device) to provide grocers with a unified view of incoming deliveries.

With Load Tracker, you can anticipate what is returning to the distribution center and efficiently manage its subsequent destinations.

Key Benefits Include:

-  **Complete Visibility:** The Load Tracker aggregates data from Kaleris TMS and ELD, offering real-time updates on incoming loads, estimated arrival times, and order details.
-  **Reduce Manual Effort:** Retail partners can access all relevant delivery information in one place, eliminating the need to constantly contact dispatchers or clerks for status updates.
-  **Seamless Integration:** The Load Tracker integrates with your existing systems, helping you track each load from start to finish.
-  **Better Scheduling:** With advanced notifications, gate appointments can be scheduled with trailer destination planning far in advance of arrival at the gate.
