

KALERIS

Transportation Management for Manufacturers

Real-Time Insights for Smarter Logistics Management

CAMS Prospero, now a part of Kaleris Transportation Management, is designed to streamline the inbound logistics process by facilitating management of multiple sites and integrating with advanced tools for load tendering, carrier integration, and profitability analysis.

Automation for better logistics management.

This platform enhances operational efficiency by automating load creation, optimizing backhaul operations, and providing real-time dashboards for load management and carrier performance evaluation.

Key Benefits Include:

Centralized Management: The system allows for centralized management of inbound logistics, making it easier to oversee operations from a single location.

Load Tendering and Auctions: The system supports efficient load tendering and auction processes, including EDI integration and customizable tender sheets.

Carrier Payment and Scorecarding: Features include a streamlined carrier payment process and a carrier scorecard system to evaluate performance.

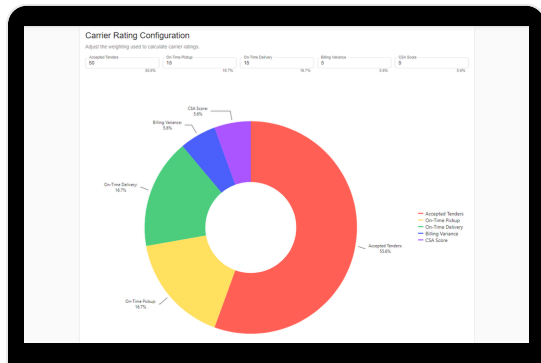

Carrier Rate Negotiations: Streamline carrier rate negotiations through an automated system that facilitates competitive carrier bidding, customizable auction parameters, and comprehensive bid management.

Date	Status	Value	Profit	Carrier	User
8:00 AM	0%	\$1,000	\$0	Carrier A	User A
